LAB-09

1. WAP to read an array of n integers and search for an element using linear search.

2. WAP to read an sorted-array of n integers and search for an element using binary search.

3. WAP to sort an array of n integers in an ascending order by using insertion sort.

4. WAP to sort an array of n integers in an ascending order by using quick sort.

5. WAP using Recursion to search an element in an array of n integers using linear search.

6. WAP to sort the n names in an alphabetical order.

7. WAP to implement selection sort recursively.
